CHARLIE26

INTERCOM EVOLUTO

The production intercom that fits in your pocket.

CHARLIE26 turns the control-room computer into an intercom hub. Crew members join from their own smartphone by scanning a QR code: no radios to rent, no mandatory apps.

Windows · macOS · Android · any smartphone with a browser

Free version to try

Annual licence: €50 per year

Ready in minutes

1 Start the program

It installs in a minute and finds the right network by itself.

2 Show or print the QR codes

The crew scan them: the intercom opens on the phone, nothing to install.

3 Talk

One tap opens the mic, hold to talk only as long as needed. You always see who is speaking.

Everything you need in production

Channels like a real intercom

A Production channel and one per department, separate TALK buttons, listen to several channels at once.

Clear roles

Production manager, department heads and crew: everyone gets the controls they need.

Clear voice, even in the machine room

Lightweight, low-latency audio, with echo and noise reduction designed for the toughest places.

The programme on air, on the phone

The control room sends the video: camera operators know at once which camera is live (vMix tally).

Separate programme audio

Two volumes, or a “voice over” that lowers itself when someone talks.

OBS, vMix and NDI®

The control room connects to the video and audio sources it already uses, even over the network.

QR codes ready to print

General, per channel or personal. Events saved as templates and reopened with one click.

Pop-up and earbuds

A window always on top of other apps, and the mic from the Bluetooth earbud button.

What you need

- A control-room computer with Windows 10/11 or macOS
- A local network, Wi-Fi or cable (no internet needed)
- Android phones or iPhones with an up-to-date browser
- Android app is optional

Free to try, licence to work

All features are always available: the annual licence only removes the limits of the free version.

Free version

0 €

- All features
- 2 hours per launch, then reopen the program
- Up to 5 phones together
- No sign-up

Annual licence

€50 per year

- All features, no time limit
- Unlimited phones
- Invoice and licence file by email
- Valid one year, not tied to a PC

How the licence works

1. Request it with the form on charlie26inter.com: we reply with the invoice and licence file.
2. Activate it by pasting it into the console, without restarting.
3. It lasts one year from issue and can be used on another PC when needed.
4. At expiry you go back to the free version, with a warning 30 days earlier. Events and settings stay.

Also over the internet

With the remote-access edition the crew join from their own 4G/5G network or any Wi-Fi, without being on the event network: distributed teams, several venues, nothing to set up on site. 7-day trial on request; licence and terms by appointment.
